PRAKASH A

Full Stack .NET Developer | ASP.NET Core | Angular | Azure | SQL Server

+91 9790412435 | prakasharulraj7@gmail.com | Kanyakumari, India | linkedin.com/in/prakash-a-75350425

SUMMARY

Full Stack .NET Developer with 3.7 years of experience building and modernizing enterprise web applications using C#, ASP.NET Core, Web API, Angular, TypeScript, SQL Server, and Microsoft Azure. Leads day-to-day delivery of an HR, Recruitment, and CRM modernization program covering PHP/Laravel-to-.NET migration, MySQL-to-Azure SQL migration, Microsoft Entra ID SSO, RBAC, Azure DevOps CI/CD, and production support. Improved large-dataset page load time by ~80% through API-level server-side pagination.

SKILLS

Languages: C#, SQL, JavaScript, TypeScript
Backend: ASP.NET Core, .NET Core, Web API, Entity Framework Core, LINQ, RESTful APIs, Dependency Injection, Repository Pattern, Global Exception Handling, Logging, Input Validation
Frontend: Angular, TypeScript, RxJS, PrimeNG, HTML5, CSS, Responsive Design, Reusable Components, Lazy Loading, RxJS BehaviorSubject
Databases & Data: SQL Server, Azure SQL, MySQL, Azure Data Factory
Azure & DevOps: Microsoft Azure, Azure App Service, Azure Blob Storage, Azure DevOps, CI/CD, Git, Pull Requests
Security: Microsoft Entra ID, Single Sign-On (SSO), Role-Based Access Control (RBAC), Authentication, Authorization
Engineering: OOP, SOLID Principles, Async/Await, Generics, HTTP, JSON, Server-Side Pagination, Agile/Scrum, Code Reviews, Postman, Visual Studio, VS Code

EXPERIENCE

Software Engineer | Skywalk Global Private Limited, India | Feb 2023 - Present

- Lead day-to-day development and modernization of an enterprise HR, Recruitment, and CRM platform, coordinating a 4-member development team across India and Bolivia and translating requirements into sprint tasks, technical priorities, and release plans.
- Build and maintain secure RESTful APIs for 2 enterprise applications using C#, ASP.NET Core, Entity Framework Core, and LINQ, with input validation, centralized exception handling, and application logging.
- Engineer reusable Angular components, lazy-loaded feature modules, and responsive role-based workflows for 5 user roles - HR, Recruiter, Manager, Admin, and Super Admin - using RxJS-based shared state management.
- Deliver full-stack functionality across Product, Vendor, Customer, and Billing modules for a Kline Electric Warehouse Management System using .NET, Angular, and SQL Server.
- Manage Git-based pull requests and Azure DevOps CI/CD releases to development and production environments; troubleshoot build and deployment failures and validate functionality after release.
- Diagnose production issues across 4 application layers - UI, API, database, and deployment - using application logs, browser DevTools, HTTP/JSON network traces, and Postman; implement and verify safe fixes.

PROJECTS

StaffNip - HR, Recruitment & CRM Platform Modernization | REMS Client
Technologies: ASP.NET Core, C#, Angular, TypeScript, EF Core, SQL Server, Azure SQL, Azure App Service, Azure Blob Storage, Microsoft Entra ID, Azure DevOps, Azure Data Factory

- Rebuilt major business modules from PHP/Laravel into ASP.NET Core and Angular after analyzing legacy workflows, business rules, and database relationships, while maintaining feature parity.
- Migrated MySQL data to SQL Server/Azure SQL using Azure Data Factory, handling schema and data-type mapping, identity columns, EF Core provider changes, row-count validation, and verification of critical business records.
- Moved application hosting from a cPanel server to Azure App Service, Azure SQL, and Azure Blob Storage for resumes and documents.
- Implemented Microsoft Entra ID single sign-on and RBAC for 5 roles, combining Angular role-based redirection with API-level authorization.
- Reduced large-dataset page load time from approximately 30 seconds to 4-6 seconds (~80% faster) by implementing API-level server-side pagination instead of loading all records into the browser.
- Contributed to a staged AI resume search pipeline that parses and stores resume content in advance and applies database filtering before AI processing to improve search accuracy, latency, and cost.

Kline Electric - Warehouse Management System
Technologies: .NET, C#, Angular, TypeScript, SQL Server

- Developed full-stack features across 4 core modules - Product, Vendor, Customer, and Billing - supporting warehouse operations and commercial workflows.
- Built REST APIs, Angular screens, and SQL Server database changes with validation for end-to-end feature delivery.
- Resolved application defects and frontend-backend integration issues for client releases.

CERTIFICATIONS

- Microsoft Certified: Azure Cosmos DB Developer Specialty
- Microsoft Certified: Azure Data Scientist Associate

EDUCATION

Bachelor of Engineering (B.E.) - Mechanical Engineering | 2021
Rohini College of Engineering, Anna University, Chennai
